## Presentation

This documentation contains how to download all our static data information.

### How does it Works?

We have an FTP with all our static data information that you can download.

- **FTP** → [ftps.avoristravel.com:2121](https://ftps.avoristravel.com:2121)
- **User** → affiliatebv
- **Password** → affiliate112011

### What can you find in the FTP?

In FTP you can find a list of files where you will find everything related to Static Data.

Below we indicate what you can find in each file.

Name of File	Description
mealplans_by_language	Contains all the board codes.
active_hotels_12-2019	Contains all our active inventory.
destination_commercial_codes	Contains the list of all Commercial codes.
destination_geographic_codes	Contains the list of all Geographic codes.
destination_zone_codes	Contains the list of all Zone codes.
destination_country_codes	Contains the list of all Country codes.
room_codes	Contains the list of all Room codes.

## Fact Sheet

We have a public endPoint in order to download all the hotel technical data, this endpoint contains 2 different attributes hotelCodes and language.

Only hotelCode is mandatory, if language is empty will show the language that we had indicated by default in our system.

Endpoint →

<https://polarisapi.avoristravel.com/staticdata/hotelInformation?hotelCode=123&language=EN>

Possible values:

- HotelCode
  - You can find all the hotelCodes in CSV hosted in the FTP.
- Language
  - Spanish (ES), English (EN), Portuguese (PT) and French (FR).

**What periodicity is in the update?**

In the Static Data we have some active files, por example, our Inventory.

For that reason, we will update every month our files in the FTP in order to have the most up-to-date information possible.

**Any doubt? – Contact us**

This document is addressed to the IT/Technical department of BedToYou-Rhodasol client.
